

CC-Series Clinic Room Status Configuration Questions

At Tech Works we understand that each room status system is unique. We offer many options to custom tailor your CC-Series Clinic Room Status System to fit your individual needs. These basic configuration questions will assist us in designing your system.

1. What type of clinic? (Orthopedic, Ophthalmology, General Practice, etc.) _____
2. How many exam rooms? _____
3. How Many Providers? (This helps determine the number of buttons / colors) _____
4. Do all providers cover all exam rooms?
(The answer to this is almost always "Yes". However, this is seldom the reality. In most cases Exam Rooms are tied to procedures, which mean to a skill set and tools, which limits the number of providers. Explore this and you will probably find that each provider covers no more than 4 rooms and there are no more than 3 providers or care levels per room.) _____
5. Is "Provider Call for Assistance" required? (Emergency Call) _____
6. Are corridor lights required? (This is recommended for long and narrow hallways, requiring wide-viewing-angle Corridor Lights.) _____
7. Do Exam Rooms require special features such as Dilation Timer? _____
8. How many Annunciation locations for the same rooms? (Nurses Stations, Receptionist, Private Offices, Labs, Etc.) _____
9. Can some of the areas in number "5" above use a Zone Light for annunciation? _____
10. Do Zone Lights need "TONE"? _____
11. Do any locations need "Patient Arrival"? _____
12. Are there special Procedure Rooms with special needs? If yes, please explain.

13. Are there Public Rest Rooms? (Pull Stations) _____
14. Do they want an IMR (Integrated Messaging & Reporting) Annunciator / Report Manager? _____
